Introduction

What *STAR* Cumulative Indexes Are

This publication contains cumulations of the indexes to *Scientific and Technical Aerospace Reports (STAR)* for the calendar year 1964 (Volume 2, Numbers 1 through 24). These are: Subject Index, Corporate Source Index, Personal Author Index, Report/Accession Number Index, and Accession/Report Number Index. The accession number is the identification given by NASA to each item indexed in the year indicated (e.g., N64-12345). In each index it is followed by a number (e.g., 13-20) for locating the abstract in the semimonthly issues of *STAR*; the first two digits of this number identify the issue of *STAR*, and the last two the particular subject category in which the abstract appeared.

This Annual Index is divided into four separately bound sections. Sections I and II contain the Subject Index; Section III contains the Corporate Source, Report/Accession Number, and Accession/Report Number Indexes; Section IV contains the Personal Author Index.

This cumulative index for *STAR*, Volume 2, Numbers 1–24, supersedes the previous semimonthly, quarterly, and semiannual indexes for the volume year.

For information on availability of *STAR* and documents, see Section I or II, pages iii and iv.

CORPORATE SOURCE INDEX

Listing of Reports by Source

Procedings of meetings, symposia, etc., are included if their sources are known. A Notation of Content, *rather than the title of the document*, appears under each corporate source. The NASA accession number is located under and to the right of the Notation of Contents (e.g., N64-12345), followed by a four digit number (e.g., 13-02) for locating the abstract. The first two digits identify the issue of *Scientific and Technical Aerospace Reports*, and the two digits following the hyphen identify the category as listed in the Table of Contents.
